

The DISCO bike makes you independent and mobile again, giving you the freedom to exercise and a means of transport for doing daily errands when it suits you

DISCO is recommended for people with special needs or who are uncomfortable mounting/dismounting a normal bike, as well as anyone who just wants a different kind of tricycle. The comfortable sofa chair at low height guarantees a comfortable and safe bike trip, every time!

The model is available as a disability tricycle for both adults and children. The DISCO tricycle is renowned for comfort, durability and excellent performance:

- easy to mount and safe to ride
- comfortable chair seat which can be easily moved backwards or forwards while riding
- extremely rugged with a long lifetime (10+ years)
- 7 gears with or without reverse function
- adapted to your special needs and delivered within 2-3 weeks

DISCO models are also available with an electric motor, and all bikes can be adapted to your special needs.

Standard equipment:

- 7 speed
- Differential
- Foot and hand brake
- Parking brake
- Adjustable seat and handlebar
- Front basket
- Lock with 2 keys
- Rear view mirror
- Seat cushion
- Schwalbe Marathon Plus tyres

Choose from the following E-bike systems:

DISCO Pedelec, Direct Power: (Direct Power motor – silent)

Standard equipment – see DISCO + extra:

The Pedelec has a “torque” sensor which ensures that the motor only operates when you are pedalling. So you have to do some work towards your own propulsion.

The power of the motor is controlled by 3 assist levels, and it automatically cuts out at 25 km/h. With a fully charged battery the bike has a range of minimum 30 km. Depending on how much pedaling you do, as well as wind and road conditions, the range can reach 35-40 km. The display on the handlebar shows you information such as speed, distance, battery level and assist level. The battery is removable, so charging can be done where you prefer.

DISCO Pedelec, Direct Power HMI nr.: 81848

Gear systems:

7 speed free wheel

7 speed with backpedal and reverse gear

DISCO LARGE HMI nr.: 10980
